

# 2-36 Spot Assay 3

---

WEDNESDAY, 2020-02-26

---

- ☒ Spot assay for summer diploid lines.

We will evaluate the prevalence of the petite mutations in the Summer diploid lines (the lines we assayed in the bioscreen during September). Linnea hopes that we can then use this dataset in our final analysis.

FRIDAY, 2020-02-28

---

- ☒ Check ypg and ypad growth.

Checked the growth of the lines - found that many did not grow on ypg. We will grow them over the weekend too.

MONDAY, 2020-03-02

---

- ☐ Mark the growth on ypad and ypg onto excel knockout spreadsheet.
