

2-35 Spot Assay 2

MONDAY, 2020-02-24

Spot assay of DKO lines 1-136 on YPAD and YPG. The previous spot assay on our transformed lines showed that a high percentage present a petite phenotype. This spot assay of the earlier double knock-out (DKO) lines may help us narrow down where they started to arise.

WEDNESDAY, 2020-02-26

- ☒ Check plates for growth and mark. Some haploid lines did not grow on the ypg. Linnea took note of these lines. We will leave the plates in the incubator for one day more to check.

THURSDAY, 2020-02-27

- ☐ Check to see if any of the suspected petite lines grew over the last day.
